LIFE SCIENCES EDITORIAL POLICY

LIFE SCIENCES was founded with the intention that scientific reports would be published expeditiously, within weeks of acceptance. *LIFE SCIENCES* has adhered to its original objective by keeping abreast of current advances in communication and publication technologies to rapidly disseminate new and significant information in pharmacology.

LIFE SCIENCES is an international weekly journal publishing full reports on the pharmacological aspects of biochemistry, neurobiology, endocrinology, immunology, molecular biology, physiology and toxicology. Contributions are reviewed and accepted on the basis of their scientific merit and the need for rapid publication. Contained in the Journal:

- New information
- Minireviews on selected aspects of a field undergoing rapid change
- Brief conceptual papers based on original data
- Relevant clinical discoveries
- Collections of selected papers on current concepts in a particular field

PHARMACOLOGY LETTERS is a section providing for the rapid review and publication in English of original research involving rigorous experimental studies of immediate interest on any aspect of basic pharmacology. Clinical studies will be included if they have a direct bearing on the mechanism of drug action. Also invited are commentaries, new methodologies and manuscripts on pharmacologic theory (either conceptual or mathematical). Articles in the Sections should be limited to 4 to 6 pages with a maximum figure-plus-table combination of 4. It is recommended that no more than 20 references be included in any paper.
